Oracle P2P Lead:

Job Description:
We are looking for a senior functional Oracle Cloud ERP P2P senior consultant with at least 12 years of relevant experience in Oracle ERP P2P Applications (Procurement, Supplier Portal, Sourcing, Inventory, Costing), with at least 3 years in Oracle Procurement Cloud experience implementing end-to-end solutions, preferably for clients in the manufacturing. Must be able to work in a fast-paced, dynamic environment with the goal of delivering high-value solutions to our Internal Stakeholders globally.

Key Responsibilities:

- Design and develop all aspects of new Cloud ERP implementations and required changes to existing Oracle EBS applications in the Procure-to-Pay stream
- Establish Global Templates for Cloud Standards and ensure compliance and make continuous updates as and when required
- Define requirements, design solutions, prototype, implement, and rollout solutions
- Write and maintain clear, concise functional and technical specifications for Cloud ERP applications and business system processes
- Configure Cloud applications as needed to support solution design
- Proactively and frequently communicate with business stakeholders to build and maintain a good working relationship
- Responsible for Integration of Oracle Cloud ERP applications with legacy or 3rd party applications
- Design and implement custom reports using Cloud ERP reporting tools to address company needs and improve the frequency, accuracy, and timeliness of reporting
- Responsible for continuous improvements and optimization of ERP Applications
- Work with other streams to ensure the integrity and, completeness of solutions
- Work with Global and Local business process owners to define requirements, jointly explore options and propose the best solution
- Provide ERP training to business process owners
- Responsible for overall quality of solutions and other project deliverables
- Gain acceptance of the proposed solution
- Assist site teams in data migration activities using best practices
- Participate in Key Design Decision making

Key skills required

- Minimum 12 years of experience in Oracle ERP procure-to-Pay implementation
- 3-5 years of Oracle Cloud ERP experience - must have done a couple of implementations for Global clients having multiple sites
- Must have done Oracle Fusion Cloud application implementation for a couple of organizations

- Implementation experience in the manufacturing sector is a must
- Strong P2P Accounting knowledge
- Ability to configure all Cloud ERP applications
- Demonstrate strong proficiency in all functional aspects of Cloud P2P application solution design, configuration, integration, and deployment •
- Excellent problem solving and debugging skills with experience in troubleshooting issues
- Fully versed with Oracle Cloud ERP implementation methodologies
- Strong analytical skills and ability to think in a complex and rapidly changing environment
- Excellent oral and written communication skills
- Willingness to travel at short notice
- Ability to contribute in multiple projects at a given point in time
- Ability to learn quickly

Qualifications

- Cloud Procurement Certified implementation professional
- CA/ICWA/CPA or MBA or B.Tech. / B.E.
